

# DRY JOINT ALTERNATIVE

**Replace your Complete Dry Joint Exhaust System with GLM's Dry Joint Alternative, Manifold + Elbow Set!**

For just over the cost of 1 dry joint elbow, you can purchase GLM's manifold + elbow set and **replace both pieces**, eliminating your costly dry joint exhaust system!

## The Difference is Clear!

### Additional Water Ports

This allows for maximum water flow through the elbow, significantly reducing the chance of blockage from any debris in the water system.

### Elimination of Exterior Water Cooling System

We have removed the exterior water ports and cast water jackets directly into the elbow & manifold, replacing the "dry joint" system with the standard exhaust system.

### Elimination of surface leaks with GLM's Superior Gasket Technology

Most Dry Joint Gaskets leak due to lack of surface contact.

With our mounting bolts right next to the water jackets, you get a secure, water tight seal!

GLM Gasket = Temp:1112° F, Thick:1/16", Compress:15-35%

**V6 & V8 S.B.  
No. 51148**  
(Comes with Gasket)
