

# GASKET TECHNOLOGY

**vs.**

**Manifold & Elbow Gaskets**

Made from a compressed material with synthetic fibers & binders. It has a distinctive green color and is extremely thin. It has a low temperature range & is used in refrigeration compressors & brake units mostly.

**Manifold Gaskets**

Made from flexible Graphite Composite Reinforced sheets laminated with Tinged tinplate and side leakage / sticking proof treatment.

**Elbow Gaskets**

Made from flexible Graphite Composite Reinforced sheets laminated with Stainless Steel SUS316 Foil and side leakage / sticking proof treatment.

**Thin**

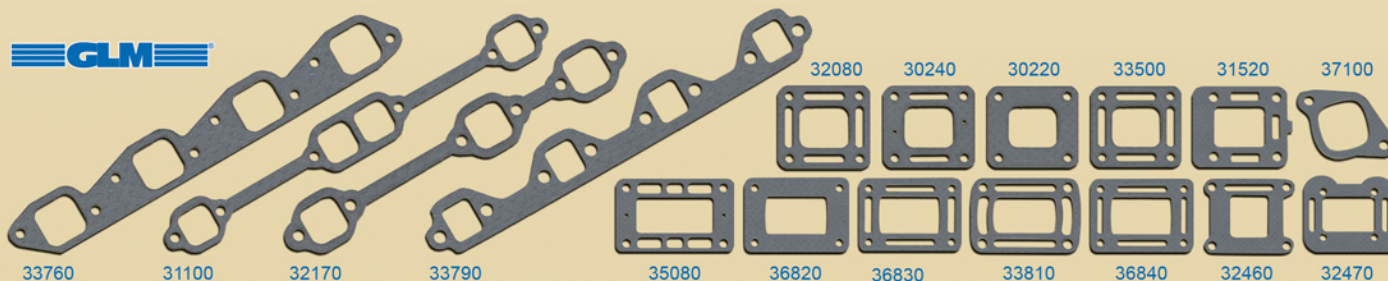

Temperature Limit	650° F
Thickness	1/32"
Compressibility	10%

**Weak**

**Thick**

Temperature Limit	1112° F
Thickness	1/16"
Compressibility	15-35%

**Strong**
