

STRONGEST GEARS ON THE MARKET

GLM Marine is proud to introduce the strongest, most durable gear set ever!

NEW PRODUCT!

Designed for the Johnson/Evinrude "O" Type, OMC Cobra & Stringer large gearcases.

GLM GEAR SET #22666

STRONGER

MORE DURABLE

QUIETER

OEM gear sets are machined from 8620 forged steel. The GLM gear set is machined from a higher alloy forged steel. The stronger teeth and higher alloy steel results in a gear that is 50% stronger than any other comparable gear set. These durable gears are capable of operating with up to 300 horsepower.

The new GLM gear set* has fewer, larger, and stronger teeth. The pinion gear has 12 teeth and the forward and reverse gears have 22 teeth. The original OEM gear set has 14 teeth on the pinion and 26 teeth on the forward and reverse gears.

During the gear machining process, an additional pass is made over each tooth for a finer surface. This makes the gear operation especially quiet.

*The new GLM gear set is designed with larger teeth, the individual gears will not interchange with the OEM gears. For individual OEM gear replacement, you must use the GLM #22623 pinion and forward gears (14/26 teeth) or the GLM #22624 reverse gear (26 teeth).
