Prop Service Tools

90095

Prop & Bearing Carrier Puller
OEM: N/A

Capacity: 5 Tons (min)

*MerCruiser All Style
Bearing Carrier & Most Prop*

TOES IN

For prop & old style
bearing carrier

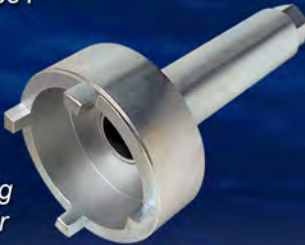

TOES OUT

For new style
bearing carrier

90190

Bearing Carrier
Retainer Wrench
OEM: 91-61069T

*Removes &
installs bearing
carrier retainer
nuts on V6
gearcases*

90490

Bearing Carrier
Retainer Wrench
OEM: 91-17257 +
90-805374-1

*Removes &
installs bearing
carrier retainer
nuts on Bravo II &
Bravo III drive units*

90230

Prop Shaft Adaptor
OEM: 91-61077T

*Provides a wrench
surface to turn the
propeller shaft on
MC-1 / R / MR / Alpha One /
Alpha One Gen II / Bravo & TRS*

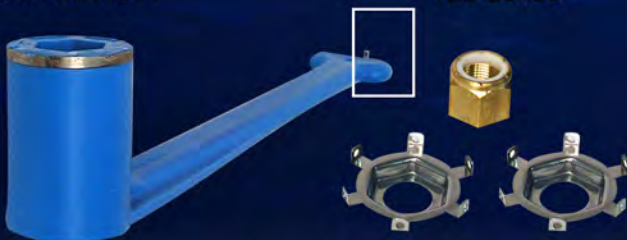

90065

Prop Wrench Kit 1-1/16"
OEM: 91-8218871

*with Built-in
Tab Bender*

*Mercury / Mariner / Force V4 & V6
All MerCruiser & Honda BF75-BF130*

90066

Prop Wrench Kit 15/16"
OEM: 91-856639A1

*Mercury / Mariner / Force Outboard 30-65 HP,
70 HP 3-Cyl. (1989 & Before), 15-25 HP 4-Stroke*

90061

Prop Wrench
OEM: 91-859046M4

1-1/16"

75, 90, 100
115, 125, 135
150, 175, 200
225, 250 HP

90062

Prop Wrench
OEM: 91-859046M3

15/16"

30, 40
50, 60 HP

90063

Prop Wrench
OEM: 91-859046M2

13/16"

20, 25 HP

90064

Prop Wrench
OEM: 91-859046M1

9/16"

6, 8
9.9, 15 HP

Aluminum Anodes

WHY THE CHANGE FROM ZINC ANODES?

- Aluminum anodes are 40% the weight of zinc anodes making your vessel's over all weight lighter, allowing better performance.
- Aluminum anodes last up to 50% longer than zinc anodes due to the electrochemical capacity being 3x's greater than zinc's capacity.
- Zinc anodes cause corrosion damage if used in salt, laden or polluted waters.
- Zinc anodes over protect the drive and boils the paint off the surface.
- Aluminum anodes self-clean in fresh water as well as activates upon re-entry to the water after hull outs.
- Aluminum anodes are now the most widely used anode for cathodic protection of exposed metals to water.
- MerCruiser recommends the use of aluminum anodes on all their 2001 & up sterndrives.

ZINC	ALUMINUM
355 Ampere hours per lb.	1225 Ampere hours per lb.
This means a Zinc anode will give one amp for 355 hours for every pound of zinc	This means an Aluminum anode will give one amp for 1225 hours for every pound of aluminum
A typical Z3 weighs 10.3 lbs.	A typical AZ3 weighs 5 lbs.
Total ampere hours 3656	Total ampere hours 6125
Assuming anode performs at .4 amp	Assuming anode performs at .4 amp
This anode will last for 9140 hours	This anode will last for 15312 hours
Which is 381 days	Which is 638 days
Which is 12.5 months	Which is 19 months

- Zinc anodes can be problematic when used in fresh water. Zinc hydroxide, an insulating layer of film, builds up and covers the zinc anodes causing failure in their corrosion protection.
- The electrochemical performance makes aluminum an ideal galvanic anode material for low resistivity environments such as salt and brackish waters.
- Aluminum anodes provide increased voltage potential for better protection.
- Aluminum anodes are lighter and stronger than zinc anodes.
- Aluminum anodes are designed for optimum performance in a variety of temp ranges and environmental conditions.
- GLM anodes come in a variety of sizes and weights to accomodate all your cathodic protection needs.

WE USE ONLY THE BEST ALUMINUM ALLOYS

All aluminum anodes die cast designs are by GLM Products, Inc. U.S.A. GLM Products, Inc. uses only the best materials to make our anodes supplied by POLCOR (Environmental Protection Engineering S.A.)

POLCOR uses Al-Zn-In alloys proven to be the best after optimisation of the composition has been tested in University laboratories. The addition of Indium is a benefactor of aluminum acting as a depassivating agent making POLCORs material the most reliable casting Aluminum on the market.

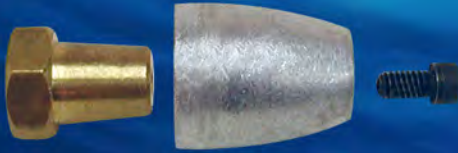

Element	PL742
Zinc	0.3-0.5%
Indium	0.02-0.05%
Iron	<0.16%
Silicon	<0.10%
Copper	<0.01%
Other single	<0.02%
Total Others	<0.10%
Aluminum	Balance
Capacity	2680 Ahr/Kg
Potential (Ag/AgCl)	-1,098 Volts
Consumption Rate	3.4Kg/year

The GLM Advantage

Diver Friendly Anodes

GLM Anodes are your Best Choice for Cathodic Corrosion Protection...

- Self-Retaining Bolts with Keepers
- Self-Retaining Embedded Nuts
- Sub Set Holes

Mechanic Friendly Tools

GLM Service Tools are your Best Choice for On-the-Spot Repairs and Maintenance...

- Prop Wrenches are Color Coded & Float
- Service Tools for Multiple Applications
- GLM Original Design 2-n-1 Wrenches

Over 4000 Aftermarket Marine Parts

GLM Products, Inc. is the Leader of the Aftermarket Marine Parts Industry
